EDUCATION

PUNE UNIVERSITY

G H Raisoni College of Engineering and Management

B.TECH IN COMPUTER SCIENCE

Honors in Data Science May 2025 | Pune,IN

Cum. GPA: 8.4 / 10.0

GOVERNMENT POLYTECHNIC MIRAJ

DIPLOMA IN COMPUTER SCIENCE

March 2022 | Miraj,IN

Cum. Percentage: 88.69

COURSEWORK

UNDERGRADUATE

Machine Learning

Deep Learning

Object Oriented Programming

Data Structure and Algorithms

Operating Systems

Cloud Computing

Web Development

Database Management

Computer Networks

NoSQL Database

Business Analysis and Intelligence

Unix Operating System

SKILLS

PROGRAMMING

Frequently Used: Languages and Technologies

Python • Shell Scripting • Machine

Learning • Javascript • Java • SQL

Docker

Used Languages and Technologies:

C • C++ • CSS • PHP • React

Node.js • Git

Familiar with:

Amazon AWS • Azure • MongoDB

EXPERIENCE

DISRUPTIVE NEXT (PHOENIXGEN) | SOFTWARE ENGINEER INTERN

June 2015 - Present | Pune, IN

FINANCIAL SUPER APP

- Containerized 10+ micro-services using Docker and optimized data pipelines with Apache Airflow, reducing deployment and workflow execution times by 30
- Designed graph database models in Neo4j and integrated vector search using Weaviate and Qdrant, enhancing query performance and search accuracy by 20
- Extracted and analyzed 20GB of unstructured data using Unstructured.io; leveraged QDrant for vector and graph databases, accelerating data retrieval times by 40% and improving query accuracy by 25%
- Enhanced team collaboration and version control effectiveness by implementing Git practices within an Agile environment; improved project delivery timelines, ensuring on-time completion of three critical software releases.

PROJECTS

MATRIMONIAL WEBSITE January 2022

- Architected a feature-rich matrimonial website using HTML/CSS, JavaScript, PHP, and MySQL, implementing 10+ interactive components.
- Developed an intuitive interface that seamlessly integrated JavaScript functionalities, enhancing user interaction for over 50 mock profiles by enabling real-time updates and responsiveness to inputs across the platform.
- Engineered relational database structures with MySQL to enhance data integrity for more than 200 user accounts; enabled seamless management of personalized experiences while reducing query response time by an average of 30

WEATHER FORECAST APPLICATION November 2023

- Created an Android application using Android Studio, enabling users to search weather forecasts for 100+ cities via API integration.
- Engineered intuitive user interfaces with seamless navigation to enhance user experience and accessibility.
- Integrated real-time weather APIs to deliver accurate and timely forecasts, ensuring precise data display.

FACE DETECTION USING PYTHON OPENCV June 2024

- Developed an advanced facial recognition system utilizing Python and OpenCV, achieving a 95% accuracy rate in processing live video feeds for real-time applications in attendance automation.
- Automated attendance tracking for 10+ individuals by integrating a CSV system to store and update records.
- Streamlined real-time camera access and facial detection with 95 % recognition accuracy.

CERTIFICATIONS

2024 Silver Medal Introduction to IOT (Swayam)

2024 Silver Medal Enhancing Softskills (Swayam)

2024 Badge Journey to Cloud: Envisioning Your Solution (IBM)
